DETAILED ACTION

Supplemental Election/Restrictions

This Supplemental Election is provided in view of an error made during the issuance of the original Restriction Requirement mailed on March 31, 2006, to claims that were canceled in the Preliminary Amendment filed on July 23, 2003. Accordingly, all objections and or rejections in the Office Action mailed on September 14, 2006, are withdrawn.

Claims 28-41 are pending in the instant application, and are the subject of the Restriction Requirement below.

Election of Species

This application contains claims directed to the following patentably distinct species of the claimed invention:

- A) *the mature enzyme* – Applicants are required to elect a single species of the mature enzyme. When electing, Applicants are required to identify the activity of the enzyme (e.g., claims 30 and 37), and identify the enzyme by SEQ ID NO, and clearly indicate if there are any amino acid substitutions in the elected enzyme when compared to the “naturally occurring” enzyme (e.g., see claims 32 and 33). If Applicants elected species is the “naturally occurring” enzyme, Applicants should state that fact for the record.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Each of the species categorized above is directed to patently distinct species, wherein each of the species is materially and/or functionally different than the others.

Further, it is a significant burden to examine more than a single species of each of the species categories as set forth above because the art is divergent and not necessarily coextensive. Art related to a given species that is materially and/or functionally different from the others would not necessarily disclose or make obvious each of the species. For example, enzymes having EPSP synthase activity compared to those having GS activity.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. Currently, claims 28 and 35, are generic.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR § 1.141. If claims are added after the election, Applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Correction of Inventorship

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Time for Reply

Applicant is reminded that 1-month (not less than 30 days) shortened statutory period will be set for reply when a written requirement is made without an action on the merits. This period may be extended under the provisions of 37 CFR 1.136(a). Such action will not be an "action on the merits" for purposes of the second action final program. M.P.E.P. § 809.02(a).

Art Unit: 1639

Conclusions

If Applicants should amend the claims, a complete and responsive reply will clearly identify where support can be found in the disclosure for each amendment. Applicants should point to the page and line numbers of the application corresponding to each amendment, and provide any statements that might help to identify support for the claimed invention (*e.g.*, if the amendment is not supported *in ipsius verbis*, clarification on the record may be helpful). Should Applicants present new claims, Applicants should clearly identify where support can be found in the disclosure.
